ASSAY DESIGN ASSISTANT (BIOINFORMATICS)

£20-23k per annum dependant on experience

YouSeq is a biotechnology company that makes molecular testing kits that are used in hospitals and labs around the world to help fight cancer and other diseases.

We specialise in custom qPCR solutions, and we are looking for an exceptional, ambitious and logic-minded life science graduate to help us design and develop assays for our exciting product offering. While this role is desk-based, you will interact with the wet-lab scientists on a range of projects. You will also work closely with the commercial team to ensure successful delivery of products to our customers.

The ideal candidate will have a life science degree and some relevant bioinformatics experience. They will be a high energy individual with a great attention to detail and a strong desire to learn. Any additional training that is required will be offered in-house.

The role will be varied and dynamic but will include:

- In silico assay design
- Quality system management and record keeping
- Progress reports for management
- Opportunity to develop hands-on coding skills if desired

YouSeq is a start-up and this role comes with all the fun that that brings. Your work-life will be varied and fast moving. You'll need to be ready to pivot and move as the company grows. We can't offer you a defined career path, but we can offer you an infinite opportunity to have influence, to shape, to do good and to have a fast-growing career in a fast-growing company.

Essential qualifications/skills

- Life science degree
