

#2 IN THE SUNDAY TIMES 100 TECH

We are thrilled to share that YouSeq has been ranked second in **The Sunday Times 100 Tech, Britain's fastest-growing private technology companies**, recognizing Britain's fastest-growing private technology companies. This achievement is a testament to our unwavering focus, innovation, and commitment to our mission—especially during one of the most challenging periods in modern history.

The Sunday Times 100 Tech 2025

Staying True to Our Mission Amidst the Pandemic

The COVID-19 pandemic presented the world with unprecedented challenges. At Youseq, we played a critical role in the global response by manufacturing over **30 million COVID-19 tests**. While this was an extraordinary achievement, it was never our primary goal—it was a responsibility we embraced as part of our commitment to public health.

“We never lost sight of our mission,” says Youseq CEO Anoop Pillai. “Even while scaling our operations to meet the urgent demand for COVID-19 testing, we stayed focused on our broader vision: creating comprehensive diagnostic solutions that can detect multiple diseases with a single test.”

This resilience and clarity of purpose have been key to our growth. While we are proud of our contribution during the pandemic, our eyes remained firmly on the future—building more advanced, all-in-one diagnostic tools that transform how diseases are detected and treated.

Post-COVID Growth: Bigger Plans, Bolder Innovations

As the world transitioned out of the pandemic, we doubled down on innovation. Our focus is on creating **multi-disease diagnostic panels**—tests that can simultaneously detect a growing number of diseases with unprecedented accuracy. Using NGS (Next Generation Sequencing) and qPCR technology has the potential to revolutionize early diagnosis, improve patient outcomes, and reduce the burden on healthcare systems worldwide.

“Diagnostics is about precision, speed, and impact,” Anoop Pillai explains. “Our strategy post-COVID is to expand the boundaries of what’s possible in diagnostics. We’re

leveraging cutting-edge technologies to deliver tests that are not just comprehensive but also accessible to a global population.”

A Strategy Built on Resilience and Collaboration

Post-COVID, we’ve refined our approach to growth, driven by three core principles:

- 1. Relentless Innovation:** Investing in R&D to expand the capabilities of our diagnostic tests.
- 2. Expanding operations:** YouSeq is in the process of refurbishing its third R&D/manufacturing premises in the UK and has opened warehousing and distribution facilities in the United States.
- 3. Scalable Solutions:** YouSeq has invested heavily in automation technology to accelerate its manufacturing capabilities

This strategy has propelled Youseq to the forefront of the diagnostics industry and earned us recognition in **The Sunday Times 100 Tech**. But we see this as just the beginning.

Grateful for Today, Excited for Tomorrow

While we celebrate this milestone, we know there’s much more to achieve. Our ranking is not just an acknowledgment of our growth—it’s a challenge to continue pushing boundaries, innovating fearlessly, and staying true to our mission.

“To be ranked #2 is an honour, but it’s also a reminder that we have much further to go,” says Anoop Pillai. “We are grateful for the recognition, but our real work is just beginning. The future of diagnostics is within reach, and we’re determined to lead the way.”

Thank You to Our Team, Partners, and Customers

This recognition would not have been possible without the incredible dedication of our team, the support of our partners, and the trust of our customers. You inspire us to aim higher every day.
