UTI qPCR PANEL

Powered by Tetra™ MasterMix

INTRODUCING OUR UTI qPCR PANELS, DESIGNED WITH YOUR LAB IN MIND

YouSeq specialise in designing multiplex qPCR pathogen detection kits. We are now offering our customers the freedom and convenience to select exactly which of these targets they would like pre-dispensed into 96 well or 384 well plates to create larger panels.

You can choose from our current library of targets, or we can custom develop them for you. We can then design the plate layout for you to fit in the maximum number of samples to drive efficiency and detect more.

Urinary Tract Infection Targets

Acinetobacter baumannii	Corynebacterium urealyticum	Morganella morganii
Actinobaculum schaalii	Cytomegalovirus	Mycoplasma genitalium
Actinotignum	Enterobacter cloacae	Mycoplasma hominis
Aerococcus urinae	Enterococcus faecalis	Neisseria gonorrhoeae
Alloscardovia omniconiensis	Enterococcus faecium	Peptostreptococcus anaerobius
Atopobium vaginae	Enterococcus SPP	Prevotella bivia
Bacillus atropaeus	Escherichia coli	Proteus mirabilis
Bacteroides fragilis	Gardnerella vaginalis	Proteus vulgaris
BVAB-2	Haemophilus ducreyi	Providencia stuartii
Candida albicans	Herpes Simplex Virus 1	Pseudomonas aeruginosa
Candida dubliniensis	Herpes Simplex Virus 2	Serratia marcescens
Candida glabrata	HPV 16	Staphylococcus aureus
Candida krusei	HPV 18	Staphylococcus epidermidis
Candida parapsilosis	HPV 45	Staphylococcus haemolyticus
Candida tropicalis	Human Herpes virus 6	Staphylococcus saprophyticus
Chlamydia trachomatis	Klebsiella aerogenes	Streptococcus agalactiae (Grp B)
Citrobacter braakii	Klebsiella oxytoca complex	Streptococcus pyogenes (Grp A)
Citrobacter freundii	Klebsiella pneumoniae	Treponema pallidum
Citrobacter koseri	Lactobacillus gasseri	Trichomonas vaginalis
Corynebacterium pyruviciproducens	Mobiluncus curtisi	Ureaplasma parvum
Corynebacterium riegelii	Mobiluncus mulieris	Ureaplasma urealyticum
